DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a method for reconciling a financial account bearing records, classified in class 235, subclass 375.
 - II. Claims 13-20, drawn to an electronic apparatus for transaction processing, classified in class 235, subclass 379.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II drawn to two different subclasses (i.e., 235/375 and 235/379). The invention I includes a specific method of how to perform a reconciling process of financial transactions of a user on a user device in claims 1-12 with respect to the prior of record based on transactions recorded in the user device and transactions recorded in the financial institution. The invention II includes a specific electronic apparatus in claims 1-12 with respect to the prior of record displaying transactions comprising a touch screen, an alphanumeric keyboard, a numeric keypad, etc. Therefore, the invention of Group I and Group II are distinct from each other.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
